MiWaEduNet Webinar Series:

Hydrogeology of mine residue deposits (MRDs)

Objective of the Webinar: An introduction to the conceptual understanding of different Mine Residue Deposits (tailings dams, discard and waste rock dumps, backfilled opencast mines) and its impacts on the water balance and geochemistry.

Facilitator

Prof. Kai Witthueser has more than 25 years of experience in hydrogeology, specialising in environmental impact assessments, hydrogeological and geochemical modelling. He is an Associated Professor at the Institute for Groundwater Studies, University of the Free State since 2009.
